I spoke with Tom at Antech PennHIP. The database is ranked based on the loosest hip so he could only look up based on Zoe's "worst" hip (which is still very tight). There are 6 Presa Canarios with hips 0.33 or tighter - 3 males and 3 females. So based on Zoe's "worst" hip, she is in the top 3 bitches for her breed. He could not give info based on the 0.22 hip.

Hope this helps,

Dr. Cindy
